Professional Summary

Pre-final year B.Tech student in Computer Science and Engineering (Data Science) with experience in full-stack development, RESTful APIs, database management, and scalable web applications using React.js, Node.js, Express.js, MongoDB, MySQL, and Python. Strong interest in backend engineering, system design, and software development.

Education

Haldia Institute of Technology	2023–Present
B.Tech in Computer Science and Engineering (Data Science)	CGPA: 8.49/10
K.T.P.P High School, Kolaghat	2022
Class XII (Science)	91%
K.T.P.P High School, Kolaghat	2020
Class X	90%

Experience

Full Stack Development Intern, IALSD Jan 2026

- Developed RESTful APIs and backend services using Node.js, Express.js, and MongoDB.
- Implemented JWT authentication and optimized database workflows.

Trainee, Visteon Scholar Program Jan 2026–Present

- Gained exposure to embedded systems architecture, software integration, and system-level engineering concepts.

Projects

Sendora – Full Stack Email Management Platform GitHub | 2026

- Developed a full-stack email management platform using React.js, Node.js, Express.js, and MongoDB.
- Built secure RESTful APIs and implemented authentication and email handling features.
- Designed a modular backend architecture and integrated MongoDB for efficient storage and retrieval of user data.
- Implemented responsive UI components and optimized API interactions to enhance performance and user experience.

Synth Library – Full Stack Digital Library Management System GitHub | 2026

- Developed a full-stack library management platform using React.js, Node.js, Express.js, and MongoDB Atlas.
- Built secure REST APIs with JWT authentication and role-based access control.
- Implemented book search, issue/return management, and user-specific dashboards to streamline library operations.
- Integrated MongoDB Atlas with role-based access control to ensure secure and efficient data management.

Book Recommendation System Host | 2026

- Developed a recommendation engine using Python and Flask with API-driven backend services.
- Implemented testing and debugging procedures to ensure reliability.

Medical Insurance Cost Prediction GitHub | 2025

- Performed exploratory data analysis and built regression models using Python, Pandas, and NumPy.

Technical Skills

Languages: Java, Python, C, SQL, JavaScript

Frameworks & Tools: React.js, Node.js, Express.js, Flask, Git, GitHub, Postman, VS Code, Jupyter Notebook

Databases: MongoDB, MySQL

Core Concepts: DSA, OOP, DBMS, OS, CN, REST APIs, JWT Authentication, System Design

Certifications

- Oracle Certified AI Foundations Associate – 94%
- NPTEL Python for Data Science – 77%
- NPTEL Programming in Java – Elite Certificate (91%)

Leadership & Activities

- Graphic Designer Head – Team Hitian Inside, Official E-Media Club of Haldia Institute of Technology
- Teaching Volunteer – Team Eklavya
- AI Innovation Arena 2026 Hackathon Finalist
- 2nd Position in Creative Writing at Annual Cultural Meet

Languages

- English (Professional)
- Hindi
- Bengali (Native)
